Title (description)Installation of the IQ Software's IQ software product onto a Release B0 Development Sun platform running Solaris 2.5.1.

Documents Affected	Source Nos (RID, NCR, etc.) or Tech Reference

RTM Change [ ] **Start New Baseline** [ ]

Problem

DD & M has been notified that CCR 97-0365 directs a new OS to be installed on sdps2 and moved for testing by RTM. Sdps2 is the IQ Server (Release A). The development of Release B0 MSS MDA management reports is being conducted on sdps2. We need a Release B0 development Sun platform to be designated as the IQ Server and IQ Software Corporation's IQ product installed on that platform. We request emergency approval for installation of the software on a single Sun platform with at least 60 MB disk storage. Delaware has been identified as a B0 platform by Mark Carter. Solaris 2.5.1 is required to be compatible with B0 baseline.

Proposed Solution

Linwood Moses will install the IQ software and the Release B0 development directories on the Sun platform delaware this weekend to minimize critical schedule slippage. Linwood needs root access, sudo privilege to this platform or the availability of the HTSC person that is on-call Saturday to grant access.
